

Escrick Environmental Services Limited

ENVIRONMENTAL POLICY

Escrick Environmental Services is committed to managing its activities in an environmentally responsible manner through the company’s environmental management system. Escrick Environmental Services is fully committed to ensuring it conducts its operations in a responsible manner preventing adverse impact to the environment. The company will prevent pollution by managing its operations effectively, using sound environmental practices.

We will ensure continuous improvement of its environmental performance by managing its operations in order to prevent pollution and minimise disturbance to neighbours and the general public.

The company’s objectives are.

- As a minimum, to comply with applicable legislation, codes of practice, and any other legal requirements.
- To comply with the requirements of relevant planning permissions and environmental permits.
- By clear communication and management, to ensure employees, contractors and third parties comply with applicable environmental rules and regulations.
- To train employees so that they have a full understanding of their own and company’s environmental responsibilities.
- To promote continual improvement through defining objectives and targets at the management review – and to monitor them on an on-going basis.
- To regularly audit the EMS along with the company’s commitment to the ISO 14001 standard.
- To perform, review and update impact assessments, insuring control measures are implemented for significant impacts.

This policy will be communicated to all personnel, sub-contractors and visitors to the site who may have an impact on the environmental performance of the site.
